

## MANUFACTURING

Protide is the manufacturer from start to finish. We do not contract our production to other organizations; relying on their processes, timing and standards. The result is controlled, consistent, and the highest product quality.

Our green manufacturing program is not something recent, it started 30 years ago. Protide's proprietary technologies have saved an estimated 1.6 million liters of water.

- 30+ years of knowledge and experience in formulation, fill and finish using our proprietary technologies
- FDA registered medical device company
- Products manufactured in the USA
- Highly trained and experienced manufacturing personnel
- Over 130 formulations manufactured
- Cost effective contract services
- Highest quality raw materials available such as USP or equivalent
- Commitment to customer satisfaction
