

RESEARCH AND DEVELOPMENT

As of our founding, Protide focused on significant discoveries to expand the direction of cell biology by providing well defined solutions. We have the capabilities to develop and manufacture products. We introduced a number of “firsts” for cell growth, cell processing, and cryopreservation.

Innovative technology and innovative products leads to innovative discoveries.

Areas of Interest

Cell therapy

Cellular Metabolic Suppression

Cryopreservation

Biomaterials

Regenerative medicine

Transfusion medicine

Cell engineering
